Zombie games have infected and devoured their way through all platforms. Their popularity and demand have never been higher, and as a gamer and horror fan, it is a trend I'm happy to see. Last month alone saw at least three major zombie releases, including young Juliet Starling's wacky adventure in LOLLIPOP CHAINSAW , and now, two new downloadable titles ZOMBIE HQ for iOS and THE WALKING DEAD EPISODE 2: STARVED FOR HELP.

Publisher Fuse Powered and developer Rebellion combined forces in their latest outing, available free on iOS, called ZOMBIE HQ. ZOMBIE HQ places you in control of a survivor during the zombie apocalypse. Like other undead titles, your job is to fight off the endless hordes, while rescuing survivors and scouring for supplies such as powerful guns and ammunition to keep you alive. As with most other games in the App Store, don't expect much in terms of a storyline here; gameplay and presentation makes or breaks most iOS titles.

Luckily, ZOMBIE HQ features both addictive gameplay and an excellent presentation. You'll battle your way through waves of zombies across three stages and 18 different missions that include scavenger, food drops, and of course, boss battles. ZOMBIE HQ isn't a cakewalk, but you'll earn experience points to unlock statistical upgrades to become a master zombie slayer. You'll also unlock various costumes to look the part with armor, hockey masks, beerhats, sports equipment and other costume accessories ready to wear. No zombie game would be complete without tons of powerful weaponry to tame the hordes, so it's no surprise that you'll find machine guns, shotguns, flamethrowers, chainsaws, explosives and plenty of other awesome weapons to take out your enemies in ZOMBIE HQ.
